Hosting Online Test Prep Class:
Targeting Speaking and Writing
for Study Abroad Students

In Nepal — and around the world — students are surrounded by English: in music, movies, textbooks, and classrooms and especially on the net.

Yet when it's time to speak or write in English for real-world purposes like international university admission tests, many still feel unsure or underprepared.

Fluency takes more than passive exposure — it takes targeted practice and smart strategies. That's why we created this online class.

Why This Class Works:

- **Test-Specific Strategies:** Not just general English — targeted strategies for these types of exams.
- **Real Practice, Real Feedback:** Students don't just practice — they get personalized feedback from a NATIVE ENGLISH speaking teacher to improve fast.
- **Confidence Building:** Step-by-step coaching helps students feel ready to perform under pressure.
- **Built by Experts:** Developed by experienced educators who understand the challenges Nepali students face — and how to overcome them.
